IMPORTANT SHIPPING INFORMATION

Please read before sending your order.

SEED ORDERS . . . We enclose cultural directions to assist you. When seed arrives, place the packets in the refrigerator (not freezing compartment), or coolest place, until planting time.

In the State of Washington, please add 3% State Sales Tax.

PLANT ORDERS . . . If you want the plants shipped by Parcel Post, please add postage, otherwise we ship Express collect.

Air-Mail package for one dozen seedling plants add \$2.10 for postage.

Please do not send personal check under \$1.50 unless you add 10 cents for collection fee. For the states of Washington, Oregon and Idaho the postage and handling charges are 20 cents only.

Named Series of the Pacific Hybrid Strain

SUMMER SKIES . . . What better words can be chosen for this favorite than the crystal clear, unshaded blue of a bright summer's day. The white bee flashes against the lovely, light blue. Flowers up to 3 inches across.

BLUE BIRD . . . The rare and thrilling flash of the blue-bird's wings is caught in this finest medium delphinium blue. There are slight iridescent hues at the floret tips. A very fine white bee. Flowers up to 3 inches across.

BLUE JAY . . . Every Delphinium lover seeks the true blue color, which is so difficult to obtain. The color is a medium to dark blue, with dark contrasting bee. Individual flowers up to 3 inches in diameter.

GALAHAD . . . Always there is a special beauty to a pure white flower. This series is the triumph of the whites with a frosted sheen folding away from the pure white bee. Flowers up to 4 inches across.

PERCIVAL . . . This is the other giant white that merits a place in this group. All is glistening white but the startling black bee. Flowers up to 3½ inches across.

LANCELOT . . . The beautiful flower of this very large Delphinium whispers of the clearest lilac self. Its white bee continues the delicate tones. A rare color in Delphinium. Flowers up to 3 inches across.

GUINEVERE . . . The silken petals are of softest pink-shaded lavender, with good white bee. This is one of the most delicate of the named series. Flowers up to 3½ inches across.

CAMELIARD . . . Now the clearest, truest lavender with exceptionally large flowers. The very double flowers swirl from a white bee. Flowers up to 3½ inches across.

KING ARTHUR . . . Of course, the King must wear the royal purple, with faint glows of royal blue at the base of the florets. The white bee is like a shining shield upon the regal velvet. Flowers up to 3 inches across.

BLACK KNIGHT . . . The darkest violet of all with the black bee intensifying the mysterious depths of each flower. Even the flower stems are darkest green to accentuate the deep tones. Flowers up to 3½ inches across.

ROUND TABLE . . . Here you may have the whole glorious array of all the Pacific Hybrids in new color combinations, always blending into an exciting and beautiful picture. Flowers up to 3½ inches across.

DREAM, Pudor's . . . One of the best shadings of sky blue and soft pink originated on the West Coast. White bee. It has very well formed flowers with excellent sheen. Flowers up to 3½ inches across.

SEEDS

Approximately 200 seeds in each full packet.

1 packet, your choice	\$ 2.00	1 half packet	\$1.00
6 packets, your choice	10.00	6 half packets	5.00
12 packets, your choice	17.50	12 half packets	9.00

SEEDLING PLANTS

From March to June and September to November we are offering strong-rooted seedling plants in the superb Giant Pacific Hybrid Strain. Transplanted, they will grow rapidly; they will bloom from summer until frost. All the exquisite delphinium colors are included in the plants—deep blue, sky-blue, lavender, pure white, violet purples and pinks shaded lavender, with individual blossoms up to 4 inches across. The plants cannot be segregated, nor are they labeled.

Hardy Seedling Plants at \$4.00 per dozen, or \$2.50 per half dozen, plus 40 cents for postage and packing. If postage is less we add more plants.

NAMED PLANTS, that have already bloomed in our gardens, \$1.50 each or \$15.00 per dozen. Make your own selection from the named Series. No order less than 3 plants. Six plants and more we ship Express collect. We add more plants to make the Express charges more even. Add 40 cents for less than 6 plants.

OFFERMAN'S SILVER QUEEN

It has all the opalescent splendor of true Mother of Pearl, shining from the bud through to the shimmering loveliness of the huge double flowers. It brings to one all the soft shades of distant mountains in a summer twilight.

The bee, whatever the intensity of white, or brown, or black, lends an enchantment to each flower. I never have been sure which bee I like best for this flower.

As Silver Queen opens, it is as if a bright moonbeam has come to shine upon each flower, sending the twilight colors into the shadows, leaving only a breath of opalescence in its silvery light.

SEEDS

1 packet (200 seeds).....\$3.00

Plants of Silver Queen \$2.50 each

"MADEMOISELLE"

This lovely, low-growing plant, of softest, creamy chartreuse, is an entirely new color in our Delphiniums. It is a truly tantalizing color that raises the tempo of any garden group. It has the large, double size of the Offerman creations. Whether the bee is black or matching, it is always accented with a brush of chartreuse. The extremely piquant air of this palest chartreuse catches everyone's eye in the gardens.

SEEDS

1 packet (200 seeds).....\$5.00

(No plants for sale)

OFFERMAN'S EXHIBITION STRAIN

The finest mixture from the excellent stock of Offerman Gardens. For the Delphinium grower who enjoys new color combinations and the fun of trying the "unknown" this will be his choice. From this Strain came our largest flower this season, measuring 4¼ inches across.

SEEDS

1 packet, approx. 200 seeds.....\$2.00

Clumps of the Exhibition Strain \$12.00 per dozen or \$6.50 per half dozen, shipped Express collect. I add more plants to make up the Express charges.

DELPHINIUM HYBRIDS for Your Garden

Their stately splendor so enhances the garden that they have become the stars of the June picture. The September display brings a brilliant contrast to the rush of autumn colors and is often enjoyed even more than in midsummer. The harmony of the beloved delphinium blues shade into the delicacy of hushed lavenders, are lifted upon notes of purest white, only to play back into the thunderous tones of the Black Knight.

Perhaps the most gratifying quality of the superior Delphiniums of today is the hardiness and good nature allowing every garden to own this aristocrat. These newer strains of Delphiniums are no temperamental hybrids. Seldom is found a perennial that gives such a gigantic exhibition from seed in one year. In all of our Delphinium stock, you will enjoy superior quality in the strong stems, luxuriant leaf growth which will send forth a breath-taking spire of beauty, exquisite in every detail. The spires in Offerman Gardens average 6 feet tall and individual blossoms 3 inches across, with no less than 13 and up to 22 petals.

OFFERMAN ADVICE . . .

Each year I receive many letters asking for advice on Delphinium culture. With the hope that a few of my notes may be of help, I will answer some of the most-asked questions.

ABOUT THE SEEDS . . . There are two seasons to start Delphiniums from seed, Spring and August. In parts of the country that have cold winters, the summer sowing should be done between July 15th-August 1st to give the seedlings a better "toe-hold" for winter. The spring planting will bloom in the fall of the same year.

For the soil in flats; contrary to belief, leaf mold is not essential, but sand is VERY IMPORTANT. Lighten the garden soil with sand, thoroughly mixed together. The top layer of the soil should be finely sifted, ready for the seed. To be sure the seed is not buried too deeply, I strongly advise broadcasting the seed and then sifting fine soil over the surface ONLY THE THICKNESS OF A DIME. Press the planted soil down gently . . . not too hard. Water with fine spray and cover seedbed with moist burlap or wet paper. Remove the covering as soon as the seeds come up. Remember too, a shaded seed flat is easier to keep moist and much better for the tiny sprouted seeds than too frequent watering. Good, fresh seed should germinate in 10 days to 2 weeks.

ABOUT TRANSPLANTING . . . When the seedlings are about 1½ to 2 inches high, they will have three true leaves and are ready to be moved. Depending upon the sowing time, they will either go into a coldframe or lathed seed bed in temperate climate for the winter. As soon as the frosts are over and the soil is warming up, transplant in permanent position about two feet apart.

ABOUT "BARNYARD" MANURES . . . This is, of course, the best kind of fertilizer. As for the different types (sheep, cow, goat, rabbit, horse) it makes no difference. However, ALWAYS MIX LIME WITH MANURES. When planting out my young stock, I prepare the hole by digging in lime and manure (not being too particular about its "well-rotted" quality). Cover with a little soil and set in the plant. I have never had any trouble with over-feeding or "burning" with this method.

ABOUT THE SOIL . . . The looser the soil, the better the bloom. Delphinium roots are very thin and go straight down. This is why the soil under the roots must be loose; and the deeper it is prepared, the better the plant can function. Give your plants loose soil; give plenty of water and sunshine and the joys of beautiful flowers will be yours.

Pacific Strain of Tuberous Begonias

What we believe to be the finest selection of American bred, and grown on the Pacific Coast.

DOUBLE CAMELLIA Type. The largest and most popular of the double types. Individual flowers, from 5 to 8 inches in diam. resemble camellias and roses in all forms with slight variations of color.

White, Pink, Scarlet, Cardinal-Red, Dark Red, Salmon Red, Yellow, Orange, Rose, Crimson Rose, American Beauty.

Salmon Shades, varying more or less within themselves:

Salmon Rose Shades, Apricot and Orange Salmons, Blush and Pink Salmons, Yellow and Apricot Salmons.

DOUBLE PICOTEE Shades. The flowers are very large in size, but slightly smaller in some instances but of beautiful Camellia form, with two-tones combinations of color with a definitely contrasting edge.

Colors: Salmon Shades, Red Shades, Pink-Rose Shades.

FIMBRIATA PLENA Type. Double frilled, or often called Carnation type. This group has been enormously improved in the last few years, the flowers in some cases reaching the size of the Camellia type, with more and more refined form.

Colors: White, Pink, Rose, Yellow, Orange, Apricot, Scarlet, Crimson Rose, Blush, Salmon.

DOUBLE HANGING Type. Its hanging habit, with great masses of medium-sized flowers makes them favored for the decoration of greenhouses, open verandas or sun porches. This type has been crossed with the double Camellia type for the size of flowers and variety of color.

Colors: White, Pink, Rose, Salmon Rose, Salmon Red, Scarlet, Yellow, Orange.

Price of any of the above 4 varieties as follows

Seed —

\$2.50 per packet; \$1.25 per half packet (Straight colors or mixture).

Tubers —

Large size (2" diameter)	3 for \$1.50; \$5.00 per dozen
Medium size (1 1/4" to 1 3/4" dia.)	3 for \$1.20; \$4.00 per dozen
Small size (1" to 1 1/4" dia.)	3 for \$0.90; \$3.00 per dozen

Culture of Tuberous Begonias enclosed with each order.

Tubers are available from February to April.

Colossal Strain of Polyanthus Primroses

This Giant Primrose is not only Spring's Harbinger, but its bright and fragrant giant blooms stay on to welcome Summer, for this Hardy Primrose offers a long season of bloom, and an extensive variety of colors and forms.

Individual blooms will measure 2 inches and over. Well grown seedlings from this strain will produce larger blooms than will from divisions. They are heavy textured, and the massive flower umbels are carried on 10 to 12 inch stems. The color sequence is wide and varied, with many unusual shades, from almost black, dark, velvety-red through flame red, tangerine, orange, copper, gold, yellow and cream, to white; from apple-blossom-pink through clear pink-rose, burgundy and violet, apricot, peach, salmon, lavender, fuchsia and violet tones, and many two-toned pastels.

Seed—Mixed colors \$1.25 per packet.

Pastel Selections. These are gathered from selected plants in pink, lavender, peach, apricot, salmon, rose, lilac and two-toned shades, as well as new color breaks and unusual tones, many of which have been hand pollinated. These are primroses for the discriminating, for blue ribbons as well as garden effect. These seeds may be slower to germinate. Save even the smallest seedling plant.

Seed—Mixed colors only. \$2.50 per packet; \$1.25 per ½ packet.

Culture of Primroses enclosed with each order.

CALLA RHEMANII SUPERBA—NEW—

The finest form of pink Callas yet offered in cultivation. It is far superior to the so-called pink Callas that have so far been found in commerce. Flowers are fairly large, pale pink, plant very floriferous. For rock garden and cool borders this is a real acquisition. Delivery January to April.

Price 40c each; \$4.00 per dozen

CALLA ELLIOTTIANA

The yellow Calla Lily has larger flowers than the pink and is a very effective garden plant. Planting time early in the Spring.

Price 40c each; \$4.00 per dozen

PANSY SEED

Giant Swiss — A wide variation of clear brilliant colors, including pink and rose shades not always found in this type. The color range also includes cream, yellow, orange, henna, red, flame, carmine, fuchsia, purple, blue and a little white. Plants are compact with flowers from 3 to 3½ inches in diameter.

½ Packet \$1.00 (200 seeds; Full packet \$2.00 (500 seeds).

HARDY ENGLISH BORDER CARNATIONS

These garden favorites are especially attractive and suitable for the perennial border. They will bloom during all of July and August and into September and may be left undisturbed for years. These are one of the most trouble-free of the perennials, long and faithful in their bloom.

Carnations demand only sunshine, well-drained soil, with seasonal applications of lime, bone-meal and rotted cow manure. Watering is only necessary when excessively dry and the plants are in an unprotected location. The keynote for the conservation of moisture is thorough cultivation. (Remember to set the plants far enough apart to allow this stirring of the soil.) Don't cut these varieties back after blooming!

WELL-ROOTED PLANTS in a fine mixture for your garden display.
3 for \$4.00; 6 for \$6.00; 12 for \$10.00

We take extreme pride in our Delphiniums in gardens all over the United States. Here are a few of the unsolicited letters we receive every day . . .

Offerman Delphinium Gardens,
4709 W. Stevens
Seattle 6, Wash.

June 7, 1946

Dear Sir:

At our local Garden show held yesterday, your Delphiniums took every Blue ribbon.

Respectfully,

V. G. Cook
Van Wert, Ohio

Offerman Delphinium Gardens,
4709 W. Stevens
Seattle 6, Wash.

Princeton, New Jersey
June 4, 1946

Dear Mr. Offerman:

Last summer I ordered Delphinium seed from you and I want to tell you of the great pleasure your plants have given me. They came up beautifully and the young plants are beyond anything I have ever had. They are blooming beautifully with very large florets, well spaced and with tall handsome spikes, very strong and showy for the first year.

I took some of them in to my Garden Club where they made a sensation and no doubt you will be hearing from other Princeton members.

May I please have a copy of your folder, as I want to order more seed this summer, but prefer to wait till the new seed comes in.

With many thanks for the great pleasure you have given me in producing these splendid hybrids, I am, yours truly,

Mrs. J. Barnes

Offerman Delphinium Gardens,
4709 W. Stevens
Seattle 6, Wash.

Irwin, Pa.
June 27, 1946

Dear Sir:

Enclosed please find my order for seed. I bought seeds from you now for two years and I wish you could see my flowers, some 6 feet tall, big, thick spires. People come for miles around for your address, so they can send for the seeds.

They are more beautiful than words can express.
Thank you.

Mrs. Wm. Busche

Offerman Delphinium Gardens,
Seattle 6, Wash.

Fairview, Illinois
June 1, 1946

Dear Sir:

Plants are blooming in our garden now from seed purchased from you last year. The florets of these are extremely large and beautiful beyond words.

Please find enclosed check for more seed.

Yours very truly,

Merril O. Mahr
Cincinnati, Ohio

Mr. Offerman

June 3, 1946

Dear Sir:

I thought you would like to know that the seed I bought from you last year has produced the finest Delphiniums ever grown by me, so I am enclosing a money order for 3 packets of your largest, finest mixed Exhibition Delphinium seed.

Sincerely yours,

Elmer Shepard
